The King of Opera that is becoming the backbone of Nazi Germany

Richard Wagner

What kind of man was he?

It is time to tell this straightforward story

At the time, many artists needed a patron of some sort

In order to get a patron, artists had to bow and scrape

However, Wagner became intimate with many aristocrats and millionaires

You please me

I bestow upon you the privilege of investing in me

However, he was blessed with such talent that his arrogant behavior was permitted...
His hubris was such that considered himself a genius among all of creation

Stop wasting time on trivial things already!!!
Hmph the conscience of a soldier. Fine then.
Let's flip the tiles over
You are a disgrace to the Fourth Reich!!

Yes. It's a lost technique, used while players are setting up the walls.
In short, you're loading the tiles
Eleonora's Wall
It's arranging the tiles in the walls such that the tiles you draw first make a combination.
Also known as the "Tenhou Bomb," if this bomb manages to go off, the enemy's spirit will sink so quickly that they will no longer be able to offer any resistance!!
